GIANT DOUBLE GLOXINIAS

A well grown Double Gloxinia is one of the most spectacular of house plants, normally having about 20 blooms open, completely crowning the plant, and 20 or 25 additional buds ready to carry on the procession of bloom for several months. The extra petalage adds a lot of extra color area by comparison with single varieties; making for a far more colorful display.

Double Gloxinia Seed

For several years, we have had a very concentrated breeding program on Double Gloxinias, in an effort, not only to produce additional colors, but also to overcome the problems involved in the production of Double Gloxinia Seed. Our offer below of several fine varieties is the result. Plants grown from these seeds are 100% true to color. 50 to 75% of the plants produce exquisite double flowers with an interesting variation in form. 25% produce attractive single flowers. We offer 4 colors.

F0875—ROYAL RED. Bright, luminous velvety red. The largest flowers are found here.

Controlled Light Makes Seedlings Grow Strong

Seedlings need much higher light intensity than full grown plants. A window often does not give enough light to grow strong seedlings, especially in the sometimes prolonged cloudy and rainy periods of early spring. When too little light is given, tall and spindly plants will result. Scientific studies and our own experiments proved that you can achieve the same ideal light conditions of a greenhouse in your own home by applying artificial light. Simple to use, illustrated instructions included.
